

Updating BCPS Devices

The following step can be done prior to the start of the school year in order to update BCPS devices:

1. Go onsite to any BCPS property and locate an area outside of the building where you can access BCPS Secure Wi-Fi. This includes the Baltimore County Public Library.
2. Log into the BCPS device, ensuring it is connected to BCPS Secure Wi-Fi. 
3. Allow the computer to perform updates. This may take 10-15 minutes.
4. **Restart your computer, remaining onsite.**
5. Log in again, ensuring it is connected to BCPS Secure Wi-Fi.
6. Go to <https://portal.manage.microsoft.com>.

This is the screen that will appear

You don't have any apps yet

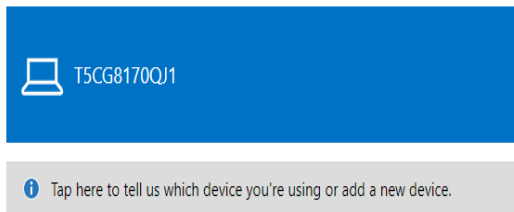

Your company hasn't made any apps available to you on this device.

Getting this device managed might let you access other company resources available to you, such as email and documents. Go to Devices to get started.

Click on the DEVICES button

Devices

There should be a tag number affiliated with the device.

Shut down the computer and you can leave the property. Please be aware that the software will not be available until school begins.

This may rectify any current issues you are having with logging in or accessing technology. If it does not, please access, <https://bcpsone.bcps.org/support/>.
